

Shankar Venkitachalam

svenkitachal@cs.umass.edu | (413) 824-1582 | 253 Amherst Rd Apt A9, Sunderland, MA - 01375

SUMMARY

Computer Science graduate student with 5 years of experience as a software engineer looking for internship opportunities during summer 2018.

EDUCATION

University of Massachusetts Amherst Aug 2017 - May 2019
Master of Science (MS) in Computer Science Amherst, MA
Relevant coursework: Natural Language Processing, Machine Learning, Neural Networks

National Institute of Technology Calicut Jul 2008 - May 2012
Bachelor of Technology (B.Tech) in Computer Science and Engineering Calicut, India
Relevant coursework: Image Processing, Data Structures and Algorithms, Advanced Topics in Algorithms, Design and Analysis of Algorithms

EXPERIENCE

Snapdeal Bangalore, India
Senior Software Engineer, Machine Learning Dec 2015 - April 2017

- Trained a product classifier that predicts categories based on title and other text data of the product.
- Used deep learning models to create an Image Quality Control System that classifies and filters images based on blurriness, JPEG quality and presence of objectionable content.
- Built a system using Apache Spark for feature extraction, clustering and nearest neighbour computation of catalog images, reducing the processing time by over 50%.
- Implementations were done using Python, Caffe, Scikit-learn, Keras and OpenCV.

Adobe Systems Bangalore, India
Member of Technical Staff II, Software Development Aug 2013 - Nov 2015

- Part of the team that created Adobe Captivate Prime, a cloud based learning management system.
- Participated in the development process from ideation and conceptualization to product release.
- Designed and implemented the content management server.
- Used Java, Spring Framework, JavaScript for implementations.

Tejas Networks Bangalore, India
R&D Engineer, Software Development Aug 2012 - Aug 2013

- Implemented MPLS-TP protocol on network switches.
- Made enhancements and bug fixes to the Network Manager codebase.
- Used C, C++ for all implementations.

SKILLS

- Languages: Python, Java, C, C++, JavaScript
- Machine Learning: Caffe, Keras, Scikit-Learn, OpenCV, Apache Spark

INTERESTS

Natural Language Processing, Machine Learning, Computer Vision.

PROJECTS

Face recognition using Biomimetic Pattern Recognition (BPR)

- Implemented a face recognition system using neural networks based on the novel theoretical model of Biomimetic Pattern recognition.
- Tested against traditional methods and achieved significant reduction in the false negative rate.

Cross-category Fashion recommendation system

- Developed a system that recommends outfit combinations using clothing items from across different categories.
- Used a twin Convolutional Neural Network model trained on pairs of images of catalog items that are frequently bought together.

AWARDS

- Won the award for outstanding performance in the quarter in Q3, 2016 at Snapdeal.
